

SOLID PAINT LIVESTOCK MARKERS

Real paint in stick form.

In the early 60's LA-CO created All-Weather® Paintstik® livestock markers to work safely on all types of livestock. This special paint formula is a proven economical way to temporarily identify animals for healthcare and reproduction protocols. In 1990 we added the Twist-Stik® livestock markers to provide the convenience of a twist-up holder to keep hands and clothing cleaner and allow the entire use of paint from each marker. The non-toxic paints provide a bright, easily identifiable mark on all types of animals in all types of weather conditions.

For economy and ease of application, All-Weather® Paintstik® and Twist-Stik® markers are an excellent choice for your livestock identification needs.

ALL-WEATHER® PAINTSTIK® Livestock Marker

- Real paint for long-lasting identification
- Resists weather and fading
- Non-toxic, safe for all animals

SPRAY LIVESTOCK MARKERS

Fast, cost-effective marking. For fast, economical marking of large numbers of livestock at one time, nothing beats a spray marker; that's why we offer both All-Weather® Stock Shot® and Quik Shot®. Stock Shot® is a spray dye in a premix or concentrated form that provides the most economical way to mark a pen full of animals quickly and easily. The high-intensity colors are long lasting and offer better visibility on all colors of animals. The Quik Shot® aerosol spray paints provide the convenience of pressure spray paint (upright or inverted) to meet your particular needs. The high-visibility colors provide immediate visual identification of all livestock types, including hogs, cows and sheep.

For convenience, fast application and large marking runs, one of the All-Weather® spray markers may be the best choice for you.
