# R32 duct unit

The discrete and high-performance high-end solution

## New installations with VMC HYGRO B

With the CSTB (French Scientific and Technical Center for Building), Hitachi has had its duct unit ATEC-verified, which now allows this solution to be installed in new builds with a VMC HYGRO B.

## Condensate pump included

So you don't have to worry about adding more on to the installation, the duct incorporates its own pumps to automatically remove condensation. (Fig. 1)

## Static high pressure

The duct has a pressure of 150 Pa so you can install it just where you want it and the user does not have to worry about enough air getting to the furthest room.

## Flexible installation

With a 30-m long cooling pipe between the indoor unit and the outdoor unit, this indoor unit can be installed in any part of the building. What's more, the level difference between the two can be up to 20 m.

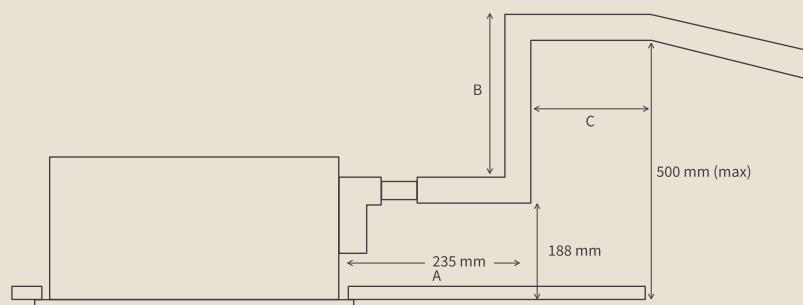

## Compatible with the airCloud Pro remote controller

In the app, you can turn the system on and off, turn the temperature up or down and program the system from anywhere in the world. All you need is a mobile phone, an Internet connection and Wi-Fi equipment (optional) to connect to the equipment.

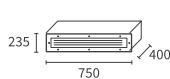

## Compatible with Airzone

With a single duct unit, the user can control up to 6 rooms separately thanks to Airzone motorized plenums that fit directly onto the Hitachi units. This level of compatibility means you are free to use the full range of Airzone air regulation products.

# Primairy R32

Best value for money

## Integrated condensate pump

With an elevation of 700 mm, these duct units fit easily into most projects.

## Flexible air intake from below or from the back

This solution offers true installation flexibility depending on the type of configuration. You can change the intake – from below or from the rear. You do not need to change the equipment, just set the static pressure. (Fig. 1)

### Versatile

Up to 8 indoor units connected to a single remote control (with HDBA21NEWH + HCWA21NEHH). See diagrams on p. 204.

## Large static pressure control range

Large static pressure control range (up to 120 Pa) for long ducts and multizone applications, allowing for a more practical and flexible installation.

## Long cooler connections and large level differences

With up to 50 m of cooling piping for an installation up to 30 m tall, the Primairy range offers great flexibility in configuring your systems. (Fig.2)

## Guaranteed efficiency

The performance of our Primairy duct unit range is guaranteed in Heating mode up to an outside temperature of -15°C. DC Inverter technology precisely adjusts the power needed to heat residential or public buildings, and ensures the comfort and durability of the system.

## Auto-restart after a power outage

When power is restored after a power outage, all pre-settings are kept and the air-conditioning will run under the previous settings.

## Discover Primairy

# Utopia Prime duct unit

A solution with R410A or R32 for projects subject to the toughest technical restrictions

## Compactness

Our indoor duct units benefit from an extra small height of just 24 cm.

## Integrated condensate pump

Hitachi ducts are equipped as standard with a condensate extraction pump of up to 850 mm, providing more flexibility when installing.

## Flexible air intake from below or from the back

This solution offers true installation flexibility depending on the type of configuration. You can move the intake – from below or from the rear on sizes 3 to 6 Hp. (Fig. 1)

## Large static pressure control range

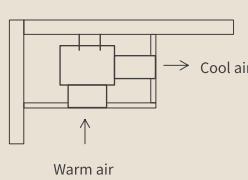

Static pressure available up to 150 Pa, with 3 possible levels, including zero pressure to blow on the vent.

## Compatible with Airzone

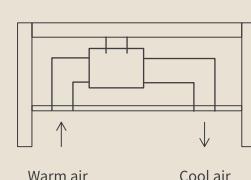

A single indoor duct unit serves up to 6 zones separately thanks to Airzone's motorized plenums and management solutions (see p130).

Fig. 1
