

Utopia Prime cassette unit

A R410 or R32 solution to meet the toughest technical restrictions

Unrivaled comfort

Separately control each vent blade and enjoy air distributed under the COANDA effect to completely eliminate any discomfort.

Energy-saving

The motion sensor (optional) automatically optimizes the level of comfort while limiting the energy consumption in rooms only occupied occasionally. It continuously analyzes thermal disparities as well as the presence of people in the room, adjusting its setting temperature (down to 2°C), fan speed, and airflow direction to suit. (Fig. 1)

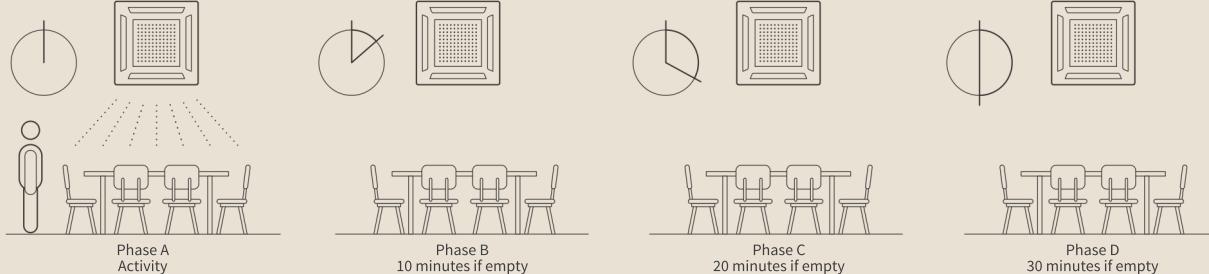

Compactness

Outdoor units are exceptionally compact, with a footprint of 0.23m².

Installation time

The 800 x 800 cassette unit fits perfectly into suspended ceilings thanks to its low recess height (248 mm) as well as in high ceilings with a possible installation of up to 4.20 m, depending on the model. In addition, it is equipped as standard with a pump to remove condensation up to 850 mm.

Fig. 1

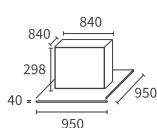

The cassette unit operates at the setpoint temperature and the chosen fan speed.

- Adjusts the temperature by +/- 1°C depending on the operating mode.
- Sets the fan speed to one setting lower.

- Adjusts the temperature by +/- 1°C depending on the operating mode.
- Sets the fan speed to one setting lower.

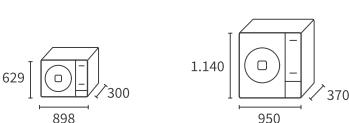

- 1. MODE ON: stays in Phase C mode.
- 2. STAND BY MODE: the indoor unit enters Unit-OFF mode and returns to normal operation when it detects motion.
- 3. Off MODE: the inside unit turns off and turn on again manually.

⁽¹⁾ Data is for guidance purposes only. It is the installer's responsibility to ensure that these cable widths meet the needs of the facility and current standards.									
⁽²⁾ Sound levels (pressure) are measured in an anechoic chamber at 1.50 m below the unit (no ceiling under the unit), with an extraction duct at 1 m and a discharge duct at 2 m.									
⁽³⁾ To ensure a cooling mode at -15°C, this option must be activated. (V) Single-phase version.									
* Data includes defrosting. To find out the data for your project, refer to our technical catalogs. ** Performance values are stated for RCI-FSR cassette units in accordance with Eurovent benchmarks.
